degreases and cleans all metals, glass, ceramics and most plastics

Cleaner S removes oily and greasy soiling from all metals, ceramics, glass and most plastics. It may, however, attack the surface of thermoplastics such as PVC, plexiglas, polystyrene, and simple paint coats. WEICON Cleaner S evaporates quickly and, unlike conventional thinners, without leaving residues.

WEICON Cleaner S can be used for cleaning and degreasing before priming and painting, for cleaning machine parts or before other WEICON products are applied on surfaces where a greasy underground would impair their effect.
